Chemical Geology (Isotope Geoscience Section), 80 (1990) 365–366
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 80, 1989/1990

Research Papers

Influences of the nature of the initial Rb–Sr system on isochron validity
Y.-F. Zheng (Göttingen, Federal Republic of Germany) 1
The Sr isotopic composition of Early Jurassic mafic rocks of Atlantic Canada: Implications for assimilation and injection mechanisms affecting mafic dykes
J.D. Greenough (Sackville, N.B., Canada), Lois M. Jones (Ponca City, Okla., U.S.A.) and D.J. Mossman (Sackville, N.B., Canada) 17
Strontium isotopes as indicators of diagenetic recrystallization scales within carbonate rocks
N. Clauer (Strasbourg, France), S. Chaudhuri and R. Subramanium (Manhattan, Kans., U.S.A.) 27
Dirty calcites, 1. Uranium-series dating of contaminated calcite using leachates alone
H.P. Schwarcz (Hamilton, Ont., Canada) and A.G. Latham (Liverpool, Great Britain) 35
A model for ^{238}U radioactive daughter loss from sediment-hosted pitchblende deposits and the Late Permian–Early Triassic depositional U–Pb age of the Müllenbach uranium ore (Baden–Württemberg, F.R.G.)
P. Holliger (Grenoble, France), M. Pagel and J. Pironon (Vandoeuvre-lès-Nancy, France) 45
Formation of accessory sphalerite by thermochemical sulphate reduction in Lower Paleozoic carbonate rocks (St. Lawrence Lowlands, Québec, Canada)
N. Tassé and K. Schrijver (Sainte-Foy, Qúe., Canada) 55
Stable isotopic composition of atypical ophiolitic rocks from east Liguria, Italy
T.J. Barrett (Montréal, Qúe., Canada) and H. Friedrichsen (Berlin, Federal Republic of Germany) 71
An improved diagram for isochron data
A. Provost (Belém, Brazil, and Clermont-Ferrand, France) 85
Cylindrical annular geometry in analysis by fast neutron inelastic scattering using an isotopic neutron source
S.E. Nonie and K. Randle (Birmingham, Great Britain) 101
Kinetic $^{13}C/^{12}C$ and $^{18}O/^{16}O$ effects upon dissolution and outgassing of CO_2 in the system CO_2–H_2O
E. Usdowski and J. Hoefs (Göttingen, Federal Republic of Germany) 109
Stable isotope analysis of multiple carbonate samples using selective acid extraction
I.S. Al-Asam (Windsor, Ont., Canada), B.E. Taylor (Ottawa, Ont., Canada) and B. South (Houston, Texas, U.S.A.) 119
Chemical separation of pyrite from chalcopyrite using hydrochloric acid in the presence of aluminium for sulfur isotope analyses
M. Yamamoto and T. Iga (Okayama, Japan) 127
An isotopic study of surficial alunite in Australia, 2. Potassium–argon geochronology
M.I. Bird, A.R. Chivas and I. McDougall (Canberra, A.C.T., Australia) 133
U–Pb age pattern for single zircons from the early Archaean Akilia association south of Ameralik fjord, southern West Greenland
L. Schiøtte (Copenhagen, Denmark) and W. Compston (Canberra, A.C.T., Australia) 147
Thermal annealing characteristics of spontaneous fission tracks in zircon
T. Tagami, H. Ito and S. Nishimura (Kyoto, Japan) 159

Letter to the Editor

Standardization of fission track dating calibration: Recommendation by the Fission Track Working Group of the I.U.G.S. Subcommission on Geochronology
A.J. Hurford (London, Great Britain) 171

Erratum 179

0168-9622/90/$03.50 © 1990 — Elsevier Science Publishers B.V.

Research Papers

Hg isotopes on the Moon and in achondrites
S. Jovanovic and G.W. Reed, Jr. (Argonne, Ill., U.S.A.) 181
Location of extraneous argon in granulitic-facies minerals: A paired microprobe–laser probe $^{40}Ar/^{39}Ar$ analysis
H. Maluski, P. Monié (Montpellier, France), J.R. Kienast and A. Rahmani (Paris, France) 193
Some observations on the interpretation of feldspar $^{40}Ar/^{39}Ar$ results
T.M. Harrison (Los Angeles, Calif., U.S.A.) 219
$^{18}O/^{16}O$ ratio determination of framework oxygen of apophyllite and wairakite by the preferential isotopic exchange of their water of crystallization
M. Noto, M. Kusakabe (Misasa, Japan) and M. Kometani (Toyama, Japan) 231
Sulphur and oxygen isotopic composition of Swiss Gipskeuper (Upper Triassic)
B. Rick (Zürich, Switzerland) 243
Precipitation of dissolved carbonate species from natural waters for $\delta^{13}C$ analysis – A critical appraisal
P.K. Bishop (Birmingham, Great Britain) 251

Review Paper

A review of the palaeohydrological interpretation of carbon and oxygen isotopic ratios in primary lacustrine carbonates
M.R. Talbot (Bergen, Norway) 261

Research Papers

A stable isotopic study of fog: the Point Reyes Peninsula, California, U.S.A.
N.L. Ingraham and R.A. Matthews (Davis, Calif., U.S.A.) 281
Variation in the strontium isotopic composition of seawater (8 Ma to present): Implications for chemical weathering rates and dissolved fluxes to the oceans
D.A. Hodell, G.A. Mead and P.A. Mueller (Gainesville, Fla., U.S.A.) 291
K–Ar geochemistry of carnallite from salt-cycle six of the Paradox Formation in Utah, U.S.A.
G.F. Huff and J.M. Wampler (Atlanta, Ga., U.S.A.) 309
Implications of isotopic and other geochemical data from a Cretaceous–Tertiary transition in southern Africa
B.Th. Verhagen, Marian Tredoux, N.M. Lindsay, J.P.F. Sellschop (Johannesburg, South Africa), A. Katharina von Salis Perch-Nielsen (Zürich, Switzerland) and Chr. Koeberl (Vienna, Austria) 319
Construction of the Triassic Triassic and Jurassic portion of the Phanerozoic curve of seawater $^{87}Sr/^{86}Sr$
R.B. Koepnick, R.E. Denison, W.H. Burke, E.A. Hetherington and D.A. Dahl (Dallas, Texas, U.S.A.) 327
U–Pb ages of zircon rims: A new analytical method using the air-abrasion technique
J.N. Aleinikoff, D.L. Winegarden and Marianne Walter (Denver, Colo., U.S.A.) 351

Contents Volume 80, 1989/1990 365
